

Sergey Vilgelm

Senior Software Engineer

*Over 13 years of software development experience with expertise in Python, Golang.
Ability to learn new technologies, out of box thinking, ability to manage projects, ability to work within tight deadlines, self-motivated, good team player.*

Current location: Seattle, WA, USA
Remote only!

Work Experience

Styra

May 2021 - present
Senior Software Engineer

- Leading the Data Sources project, adding new data sources, supporting the existing data sources, optimizing the memory consumption and performance.
- Leading e2e test framework.

Technologies: Golang, Kubernetes, Docker, Rest API (swagger), AWS, GCP

IBM

Oct 2019 - May 2021
Software Developer

Tech lead of the micro-service projects:

- **GraphQL Gateway**
a common interface to request data from different services
- **Reporting Framework**
generating reports in different formats using GraphQL gateway to collect the data
- **Pricing Rules Engine**
a common service to adjust the prices of the orders base on predefined rules or rate cards

Writing base code, reviewing pull requests, creating and tracking the tasks

Technologies: Python, Golang, Kubernetes, Docker, Rest API (swagger), GraphQL, gRPC, JsonLogic

Mirantis

May 2013 - Aug 2019
Software Engineer/Senior Software Engineer

- **IAM**
Implementing a system to provide a central point of users and permissions management for Kubernetes and OpenStack. Written in Go lang, It uses Keycloak as an OpenID provider and makes it possible to integrate OpenStack and Kubernetes with Keycloak.
Using Docker to deploy the IAM API server in a Kubernetes cluster.

- **Core developer at Patrole**
Patrole is a set of integration tests to be run against a live OpenStack cluster. It has a battery of tests dedicated to validating the correctness and integrity of the cloud's RBAC implementation.
(<https://github.com/openstack/patrole>)
- **OpenStack monitoring tool using RabbitMQ**
A monitoring tool for OpenStack uses notification channels to analyze the messages and keep a history of object changes.
- **Keystone-migration**
A migration tool for keystone objects from one cloud to another using api v3
(<https://github.com/SVilgelm/keystone-migration>)
- **Glance-replicator**
Glance-replicator for independent Keystone with api v3
- **Cloudferry**
OpenStack cloud workload migration tool.
(<https://github.com/Mirantis/CloudFerry>)
- **Neutron expert**
OpenStack consultant in Neutron's team at Ericsson. Consulting the team members, making presentations, fixing the bugs in a code.
- **Contractor at Symantec**
Fixing the bugs, improving a performance of the pl/pgsql scripts.
- **Vyatta Niblick**
Developing a Quantum plugin together with a mechanism for deploying and configuring Vyatta VMs on demand.
- **Migration Volume in Cinder**
Implementing capabilities to migrate volumes between nodes.

Technologies: Python, OpenStack components, Postgresql, Kubernetes, Docker

Reggi Business

Feb 2012 - Mar 2013

Software Developer

Enhancement of the system for domains registrar. Rewriting many modules from PHP to Python.

- **PowerDNS**
Deploying the PowerDNS. Developing the manage system for a domain records on the Django and JsonRPC. Configuring database replicas to create child dns services.
- **Zabbix**
Deploying and configuring Zabbix to monitor all Servers. Developing UserParameter scripts.

Technologies: Python, Django, PHP, PostgreSQL, JSON

Aspan Telecom

Sep 2010 - Feb 2012

Software Developer

Development and maintenance of the billing system.

- **Accounting equipment**
Developing a module of accounting equipment.

Technologies: FreeBSD, PostgreSQL, Python, Turbogears, CherryPy

Arna (BeTop, Ducat)

Dec 2008 - Sep 2010

Software Developer

- **Billing system**
Developing custom billing database, netflow collector.
- **NetUP UTM 5 Billing System**
Deploying and customizing UTM5 web cabinet.

Technologies: Delphi, DevExpress, UniDAC, PostgreSQL, Oracle, NetFlow5, PHP

Electronic Archive Corp

Sep 2007 - Oct 2008

Software Developer

- **Saperion**
Deploying and configuring the Saperion to customers.
- **Knowledge base**
Developing a knowledge base system management based on Drupal.

Technologies: VisualBasic, Delphi, PHP, Drupal

Skif Trade

Jan 2005 - Aug 2007

IT-technician, Software Developer

- **Application for the cash registers**
Developing software components for the cash registers.
- **IT-infrastructure**
Deploying IT-infrastructure within 3 supermarkets.

Technologies: Delphi, MSSQL

Academic Records

Almaty University of Power Engineering and Telecommunications, Kazakhstan.

Sep'1999 – Jun'2011

Electronic systems and technologies, Degree in Engineering.
