Russian	Native	Native

Latest Work Experience

Mirantis,
05.2013 - present
OpenStack Software Engineer

Project Name: keystone-migration
Project description: A migration tool for keystone objects from one cloud to another using api v3
(https://github.com/SVilgelm/keystone-migration)

Project Name: Glance-replicator
Project description: Glance-replicator for independent Keystone with api v3

Project Name: Cloudferry
Project description: OpenStack cloud workload migration tool.
(https://github.com/Mirantis/CloudFerry)

Project Name: Contractor at Ericsson
Project description: OpenStack consultant for Neutron's team. Teaching the members of the Ericsson's teams, making presentations, fixing the bugs in the code.

Project Name: Contractor at Symantec
Project description: Fixing the bugs, improving a performance of the pl/pgsql scripts.

Project Name: Vyatta Niblick
Project description: Developing a Quantum plugin together with a mechanism for deploying and configuring Vyatta VMs on demand.

Project Name: Migration Volume in CInder
Project description: Implementing capabilities to migrate volumes between nodes.

Technologies: Python, OpenStack components, Postgresql

Reggi Business,
02.2012 - 03.2013
Software developer

Description:
Enhancement of the system for domains registrar. Rewriting many modules from PHP to Python.

Project Name: PowerDNS
Project description: Deploying the PowerDNS. Developing the manage system for a domain records on the Django and JsonRPC. Configuring database replicas to create child dns services.

Project Name: Zabbix

Project description: Deploying and configuring Zabbix to monitor all Servers. Developing UserParameter scripts.

Technologies: Python, Django, PHP, PostgreSQL, JSON

Aspan Telecom,
09.2010 - 02.2012
Software developer

Description:
Development and maintenance of the billing system.

Project Name: Accounting equipment
Project description: Developing the module of accounting equipment.

Technologies: FreeBSD, PostgreSQL, Python, Turbogears, CherryPy

---

Arna (BeTop, Ducat),
12.2008 - 09.2010
Lead software developer

Project Name: The billing system.
Project description: Developing the billing database, netflow collector.

Project Name: NetUP UTM 5 Billing System
Project description: Deploying UTM5 web cabinet.

Technologies: Delphi, DevExpress, UniDAC, PostgreSQL, Oracle, NetFlow5, PHP

Electronic Archive Corp,
09.2007 - 10.2008
Software developer

Project Name: Saperion
Project description: Deploying and configuring the Saperion to customers.

Project Name: The knowledge base
Project description:
Developing the knowledge base system management based on Drupal.

Technologies: VisualBasic, Delphi, PHP

Skif Trade,

01.2005 - 08.2007
IT-technician, Software developer

Project Name: Application for the cash registers
Project description: Developing software components for the cash registers.

Project Name: IT-infrastructure
Project description: Deploying IT-infrastructure within 3 supermarkets.

Technologies: Delphi, MSSQL

Academic Records

Almaty University of Power Engineering and Telecommunications, Kazakhstan.
Sep'1999 – Jun'2011
Electronic systems and technologies, Master's Degree in Engineering.
